VG SICAV - BOND PLUS MULTI STRATEGY - A - CAP. - EUR (ISIN: LU1189797969)

A Sub-Fund of VG SICAV, managed by Casa4Funds SA

• OBJECTIVES AND INVESTMENT POLICY

We aim to provide you with **high returns** over time, whilst ensuring the protection of your investment.

We mainly invest **in bonds (loans)** paying fixed or variable interest, **issued by worldwide corporations** that are dealt in on a stock exchange. We may also invest in bonds that can be converted into shares, and in other funds or similar instruments.

We may also invest up to 15% maximum of the total net assets in **Cocos**. Cocos (Contingent convertible capital instruments) are a form of debt that can convert into shares or get written down when the regulatory capital of the issuer drops below a predetermined level. They are issued by financial institutions with minimum capital requirements, such as insurance companies and banks.

We aim at **protecting the value** of your investment against adverse movements in currency rates, interest rates or stock markets.

We take investment decisions on the basis of the **analysis** of companies' balance sheets, profit and loss accounts, and cash flows. This provides us with an **assessment** on the quality and ability of these companies to reimburse their bonds. We then rank them

by applying **neural network and genetic mathematics**, and invest in the best companies.

This Fund is actively managed meaning that the investment manager has, subject to the stated investment objectives and policy, discretion over its portfolio, with no reference or constraint to any benchmark.

The reference index mentioned under "Performance Fee" in the below section "Charges" is only used for the calculation of the performance fee. This share class does not distribute any income to you.

You can buy and sell shares of this class every day.

Your **first investment** must amount to **more than 1,000.00 Euros**.

In accordance with article 6 of EU regulation 2019/2088, the Sub-Fund does not promote environmental or social characteristics nor has as objective sustainable investment, as further disclosed in the Prospectus.

• RISK AND REWARD PROFILE

The above indicator reflects the historical level of risk and reward of this share class over the last 5 years. As it is based on its historical behaviour, **it does not necessarily reflect your future risk, nor reward**.

This share class is classified as above, since it has experienced **moderate movements in its price**. This classification is solely valid as of the date of this document; it can change in the future.

If you invest in a fund in the category "1" above, you may sustain a loss. A fund in this category is not risk-free at all times.

This fund does not provide you with any guarantee on performance nor on the value of your investment in it. The latter may consequently go up, as well as down.

The indicator captures the impacts on the Fund of adverse movements in financial markets and currencies, **under normal market conditions**.

The **following other risks can be significant** to the Fund:

- The bonds and funds in which we invest can be easily sold under normal market conditions. Exceptional circumstances may lead to situations where those can only be sold at a loss for you.

- The protection against adverse movements in currency rates, interest rates or stock markets may not be perfect at all times, thus leading to a loss for you.

More details on the risks you may face when investing in this Fund are described in the "Risk Factors" and "Risk Management Process" sections of the Prospectus, as well as in the "Sub-Funds Details" section thereof.
